## **EXPERIENCE**

**Parlevel Systems – San Antonio, TX**

**October 2016 – Present**

**Full Stack Web Developer**

- Develops scalable, secure, and robust web applications for vending management software using technologies such as AngularJS, PHP, and MySQL
- Integrate APIs to communicate server-side and client-side code with a variety of providers and systems
- Designs customer-facing platforms that are flexible and reusable across multiple devices and browsers

**Bravelets, LLC – Austin, TX**

**Jun 2015 – October 2016**

**Full Stack Web Developer**

- Converted Photoshop design concepts into workable eCommerce web applications that customers use to view products, make donations to fundraisers, and track their fundraising goals (front-end & back-end)
- Implemented third-party APIs into user-facing product tools that collect and manipulate data for customer information, warehousing, and non-profit organization data.
- Developed and improved tools, systems, and applications to be scalable, flexible, and communicate with our large database while eliminating bottlenecks and increasing performance

**Texas State University Mass Communication Department – San Marcos, TX**

**July 2014 – June 2015**

**Web Developer**

- Maintained and managed web content for the School of Mass Comm & Journalism department website using jQuery, HTML, and CSS
- Designed and implemented new website features and improved the functionality of existing features
- Taught students coding fundamentals such as clean code, informative comments, syntax standards, and best tools for programming

## **EDUCATION**
