EXPERIENCE

Parlevel Systems – San Antonio, TX   **October 2016 – Present**
Full Stack Developer

- Develops scalable, secure, and robust web applications for vending management software using technologies such as JavaScript, PHP, Laravel, AngularJS, Angular 2 and MySQL
- Integrate APIs to communicate with server-side and client-side code with a variety of providers and systems
- Designs customer-facing platforms that are flexible and reusable across multiple devices and browsers

Bravelets, LLC – Austin, TX   **Jun 2015 – October 2016**
Full Stack Developer

- Converted Photoshop designs into workable eCommerce web applications that customers use to view products, make donations to fundraisers, and track their fundraising goals (front-end and back-end)
- Implemented web service APIs into customer-facing product tools that collect and manipulate data for data analysis and organization.
- Developed and improved tools, systems, and applications to be scalable, flexible, and communicate with our large database while eliminating bottlenecks and increasing performance

Texas State University Mass Communication Department – San Marcos, TX   **July 2014 – June 2015**
Web Developer

- Maintained and managed web content for the School of Mass Communication and Journalism department website using jQuery, HTML, and CSS
- Designed and implemented new website features and improved the functionality of existing features
- Taught fellow students coding fundamentals such as clean code, informative comments, syntax standards, and best tools for programming
